PROFESSIONAL SUMMARY

I'm a UI/UX Designer with 3 years of design experience, backed by 5 years as an Operations Engineer. Working in operations taught me to think in systems, understand where and why things go wrong, and put the user at the center of every solution. That background also helped me develop strong analytical thinking, break complex problems into simpler, actionable pieces, and manage multiple priorities without losing focus on quality. I'm comfortable owning the full design process — from discovery and user research to wireframing, prototyping, and delivering polished, high-fidelity screens in Figma. I enjoy working across different problem spaces and I'm always thinking about how design can reduce friction and make everyday interactions easier for the people using them.

CORE SKILLS

Design Tools:	Figma · Figma Make (AI) · Miro · Balsamiq
Design:	Problem Solving · UX Research · Persona · Empathy Mapping · User Flow · Journey Mapping · Information Architecture · Wireframing · Prototyping · Accessibility · Design Systems · Design Handoff
Languages:	English · Bengali · Hindi

WORK EXPERIENCE

Relevant Experience

UI/UX Designer | Accenture · March 2023 – Present

- Delivered production-ready responsive UI designs across 6+ industries including Finance, Banking, Healthcare, Transport, Logistics, and Retail — managing multiple concurrent client workstreams and consistently meeting stakeholder expectations and delivery timelines.
- Designed and delivered agentic, Gen AI-powered solution prototypes for 20+ Accenture clients — translating complex AI workflows into clear, intuitive interfaces that helped stakeholders visualize the product vision and directly supported successful client acquisition.
- Built UI solutions for enterprise finance workflows — including Record to Report (RTR), Order to Cash (OTC), Financial Planning & Analysis (FP&A), Cash Collections, Controllers Cockpit, and Reconciliation — applying user research and iterative design thinking to simplify high-complexity financial operations.
- Utilized Figma Make (AI) to accelerate design delivery across multiple client projects — directly contributing to new client acquisitions and multi-million-dollar contract renewals.
- Improved analytics and reporting interfaces for multiple clients, reducing dependency on internal support teams and improving data clarity for end users.
- Collaborated with stakeholders, product managers, and the video team throughout ideation and Agile sprint cycles to align on vision and requirements — maintaining a unified design system and component library that ensured brand consistency across all projects and reduced production time by ~40%.
- Created a reusable Google Design Sprint-inspired ideation template for the team — standardizing the brainstorming and concept validation process and enabling faster, more structured problem-solving across projects.

Other Work Experience

Security Analyst | Accenture · Feb 2020 – Apr 2023

Software Asset Management | Nexwave · Apr 2018 – Jan 2020

PERSONAL PROJECTS

Sportivo — End to end UI/UX case study · Sports Community Mobile App · 2024

- A community platform connecting sports enthusiasts to find local events, join teams, and engage with like-minded players — led end-to-end UX from user research (20+ interviews) through personas, journey maps, and wireframes to high-fidelity Figma screens covering event discovery, team matching, and in-app chat.

RentRoam — End to end UI/UX case study · Car Rental Mobile App · 2024

- A self-serve car rental app simplifying vehicle discovery, booking, and post-rental reviews for everyday users — conducted research with 15+ participants, defined task flows and wireframes, and delivered high-fidelity screens for the full rental journey from search to booking confirmation.

Medora — End to end UI/UX case study · Medication Reminder App · 2024

- A medication management app designed for elderly and chronically ill users to schedule doses, set reminders, and track medicine inventory — designed with a strong accessibility focus, from concept to high-fidelity Figma prototype covering onboarding, dose scheduling, and inventory tracking flows.

EDUCATION & CERTIFICATIONS

- B. Tech – Electronics & Communication Engineering** — Supreme Knowledge Foundation Group of Institutions · 2013–2017
- Advanced Certification in UI/UX Design** — IIIT-B · 2024
- Design Thinking Define & Ideate** — Accenture · Feb 25, 2026
